

Edison Senior

A New Angle on Office Layouts.

Edison is the premier power, voice, and data rail system that bends to fit your space's unique needs. Create a clean, inviting environment with the Senior model, which reduces visual clutter by concealing cords behind vertically sliding cable management panels. The panel's wide selection of finish options gives you inspiring design opportunities and lends any space a refined air.

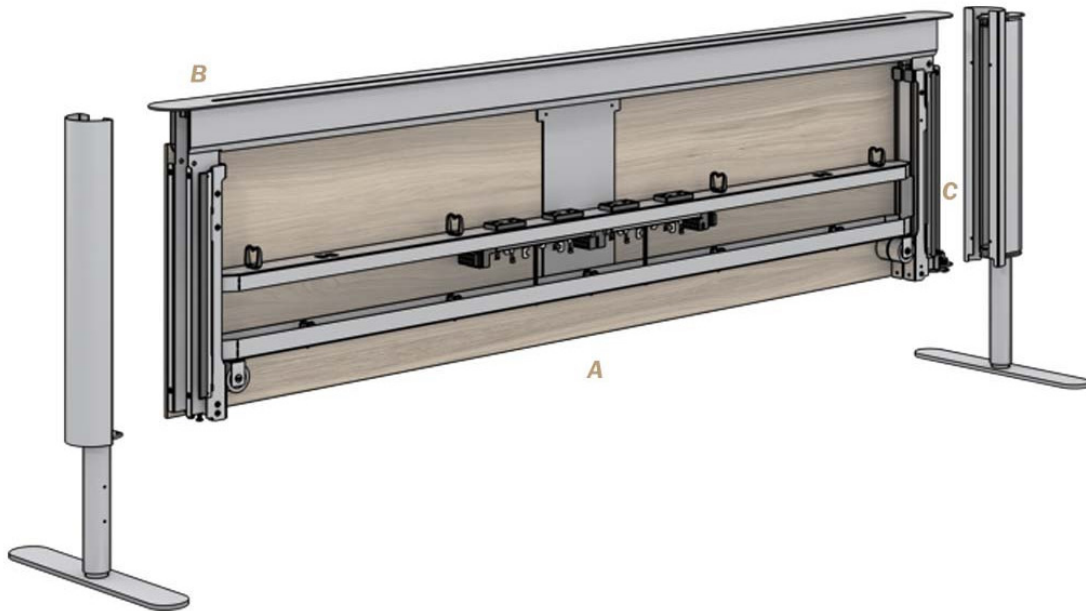

Details

The modular nature of Edison gives you endless layout potential. Workstations can be mirrored, flipped, rotated, repeated, and easily reconfigured. Further customize your design with Edison's unique selection of rail-mounted work surfaces and accessories.

Features

- Bendable rail segments create unlimited layout flexibility.
- Intuitive starter/adder specification logic.
- 4-circuit 8-wire power system, UL 1286 listed.
- Power options: either 4 or 8 power outlets, plus 2 data outlets.
- Starter segment can accept power infeed from either floor or ceiling.
- Cables pass through the pivot-point between rail segments without pinching.
- Optional perforated steel cable management basket for heavier cabling needs.
- Continuous channel along top of rail for mounting Edison accessories .

A

- Concealed cable management behind vertically sliding cable management panels.

B

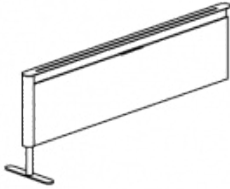

- Fabric or laminate panel options.

C

- Power and data run in separate channels.
