Tia Office

Edge Options

Tab Pull

Tab pulls are a streamlined, timeless hardware solution and are available in black and silver.

Cove Pull

Cove pulls are integrated into the face of the drawer, reducing visual clutter for a clean look.

Tia Office Specifications

Run-Off Desk Size Logic

Optional Removable Back Panel

Recessed Back Storage

All credenza and secondary storage have recessed backs to allow room for plug heads and storage to sit flush against wall

Run-Off Desk Modesty

The Tia modesty panel wraps beneath the worksurface around the outer leg. It is formed in sheet steel and can be powdercoated or covered in Forbo linoleum made from sawdust, linseed oil, and pine rosin.

Tia Office Power & Cable Management

Tia Office Storage

Stacker

Tia's open shelving uses a 1/2" cladding and 1/2" steel rod support, making it sturdy despite its thin appearance.

Wardrobe

Locker

Secondary storage units are bracketed to the Tia Office credenza, and come in three storage styles. Doors are available with Tab Pulls or touch-latch Cove Pulls.

Filing Capacities in Drawered Credenzas

- Drawers under 24"W accommodate front to back letter filing
- Drawers 24" - 36"W accommodate front to back letter or legal filing
- Drawers over 36"W accommodate two rows of front to back letter or legal filing, or a combination of both letter and legal

Recessed Back Storage

All credenza and secondary storage have recessed backs to allow room for plug heads and storage to sit flush against wall

Color Key

- Front-to-back letter filing
- Expansion for legal filing
- Reserve storage space

Desk Storage

The Tia desk storage cabinet shell, face and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The storage top and plinth panels are made from 1-1/8" thick laminate industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The cabinet shell and internal partitions are charcoal. The storage cladding material is 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The flush drawer pulls are achieved using an anodized aluminum extrusion mounted to the back side of the drawer face. All drawers are constructed from 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene and supported by undermount drawer slides with integrated soft-close mechanisms. Tab pulls are made from anodized aluminum and have subtly rounded edges and corners to prevent damage to adjacent objects. The leg clamp bracketry is made from 12-gauge cold rolled steel welded and powdered for maximum durability. The lifting mechanisms are provided by Linak and securely clamped in place to provide maximum worksurface stability. Cable management internal to the cabinet is provided by an injection molded plastic energy chain ensuring enough cable length is present in the height adjustable desk. The leg shroud is constructed from 22-gauge cold rolled steel formed with a subtle D shape.

Desk Surface

The Tia desk worksurface tops are made from either 1-1/8" M2 industrial NAF particleboard or 27mm double refined NAF MDF finished with high pressure laminate or Forbo furniture linoleum and a waterborn edge stain or 1.5mm polypropylene edge banding. The Forbo surface can have a softened waterfall edge achieved using a fused laminated NAF MDF core that is profiled and sanded prior to having the linoleum vacuum press applied. All connections are made using a robust #10-1" wood screw.

Secondary Storage

The Tia Secondary storage cabinet shell, face and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The storage plinth panel is made from 1-1/8" thick laminate industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The cabinet shell and internal partitions are charcoal. The storage cladding material is 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. If the unit has open display shelves these are constructed using 1/2" thick material also, the outer corner of the shelves is supported using 1/2" square hot formed steel rod. The cabinet doors are either supplied with an anodized aluminum pull or touch release door hardware. The units are designed to integrate with other Tia storage units and come with 12-gauge powder coated cold rolled steel mounting bracket required for stability.

Freestanding Storage

The Tia freestanding storage cabinet shell, face and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The storage top and plinth panels are made from 1-1/8" thick laminate industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The cabinet shell and internal partitions are charcoal. The storage cladding material is 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The flush drawer pulls are achieved using an anodized aluminum extrusion mounted to the back side of the drawer face. All drawers are constructed from 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene and supported by undermount drawer slides with integrated soft-close mechanisms. Tab pulls are made from anodized aluminum and have subtly rounded edges and corners to prevent damage to adjacent objects.

Tia Team Tables

Edge Options

Team Power & Cable Management

Tia in-surface power features a unique hinged lid for dual-sided access with three choices of power configurations

Single-piece top available in all Watson laminates and Forbo finishes

Monitor Mount supports monitors up to 55" and up to 60 lbs.

Embedded control switch flush-mounted in table surface in clear aluminum finish

Lifting column constructed using a precision-formed steel shroud. Adjustment range from 28" to 47.5"

User accessible utility power below the table surface

Fixed height 29.5"

Cables are routed out the back of the Tech Cabinet to wall power. Cabinet backs are recessed so they can sit flush against the wall.

Tia Team & Conference Tables | Product Specification Details

Team Table Storage

The Team table storage cabinet shell, face and internal partitions are constructed of 3/4" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The storage top and plinth panels are made from 1-1/8" thick laminate industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The cabinet shell and internal partitions are charcoal. The storage cladding material is 1/2" thick laminated industrial grade NAF particleboard finished with color matched 1.5mm polypropylene edge banding. The flush doors are operable using touch release hardware. Tab pulls are made from anodized aluminum and have subtly rounded edges and corners to prevent damage to adjacent objects. The leg clamp bracketry is made from 12-gauge cold rolled steel welded and powdered for maximum durability. The lifting mechanisms are provided by Linak and securely clamped in place to provide maximum worksurface stability. Cable management internal to the cabinet is provided by an injection molded plastic energy chain ensuring enough cable length is present in the height adjustable desk. The leg shroud is constructed from 22-gauge cold rolled steel formed with a subtle D shape.

Team/Conference Table Surfaces

The Tia team and conference worksurfaces tops are made from either 1-1/8" M2 industrial NAF particleboard or 27mm double refined NAF MDF finished with high pressure laminate or Forbo furniture linoleum. The Forbo surface can have a softened waterfall edge achieved using a fused laminated NAF MDF core that is profiled and sanded prior to having the linoleum vacuum press applied. All connections are made using a robust #10-1" wood screw. User accessible power is available as an optional add on, access is provided via a dual-action aluminum extrusion and injection molded component assembly that can rotate open from two sides. The power trough contains 3-outlets and dual charging USB, there are additional knockouts for HDMI and network connections.

Tia Table Legs

The Tia table legs are constructed from two discrete oval shrouds each constructed of two pieces of formed 22-gauge cold rolled steel that are welded together using a continuous linear TIG welding machine and finally ground flush to have a complexly seamless appearance. The shrouds are kept from scratching each other during table operation using a super simple felt guiding system. The base of each leg is a 1/4" thick laser cut hot rolled steel piece. The tops of the electric adjustable legs are held securely using a 12-gauge bracket. All metal components are powder coated to individually match customer expectation.

AV Mount

The AV mount is constructed from cold rolled steel and supports up to a 400mm x 400mm VESA mount configuration. The unit is held securely to a table edge using an innovative formed steel clamp which requires only 4.5" of surface depth above the worksurface and 1.5" underneath. The clamp is designed to work on any square edge surface between 3/4" and 1-1/4" thick.

Modesty Panel

The Tia modesty panel is available as an 18-gauge powder coated cold rolled steel sheet formed with a larger radius corner to match the top shape. The guest facing side of the modesty panel can be wrapped in Forbo linoleum.
