## Miro Desk

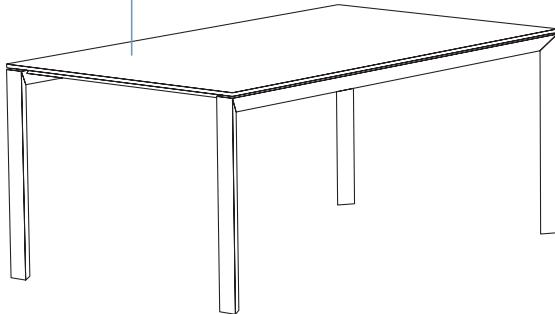

### Edge Options

Miro

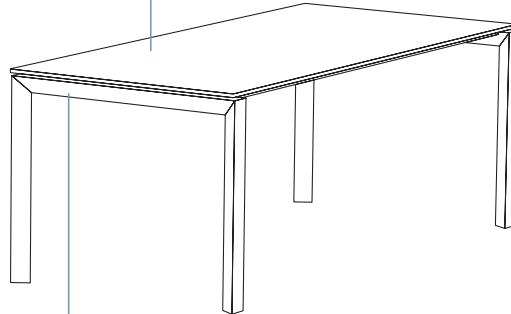

#### Viga

Designed to maximize the visibility of the Miro base, the Viga configuration is always rectangular in shape and positions the rail along the longer, user and visitor sides of the table.

#### Bridge Leg

The standard steel leg base configuration for all Miro tables is a bridge-style support positioned at the narrow ends (or end when combined with storage support) of the table.

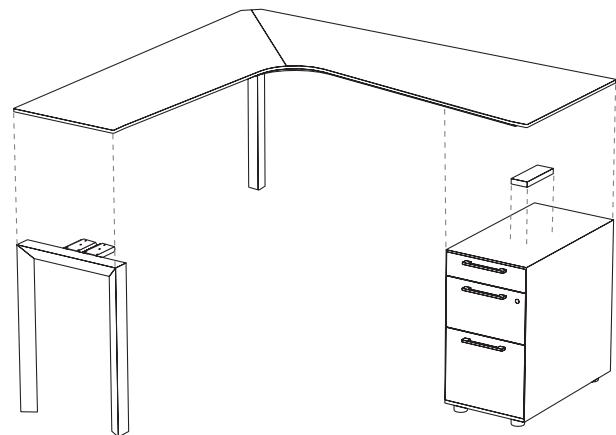

#### Storage Clearance

The bottom height of the rail is 26 $\frac{1}{4}$ " and will accommodate 23" storage, with or without casters.

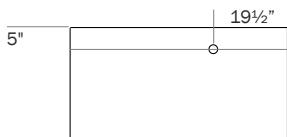

### Surface Support

- Miro desks can be supported using a base alone or by the use of a cabinet and riser block.
- Storage support cabinets can be arranged to fit directly below the desktop or they can be configured to extend 15", 18" or 21"" beyond the end of the desk (30" wide units only). This extension provides additional worksurface space for piling and filing and adds architectural interest to the space.

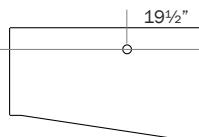

## Miro Desk Grommet Location

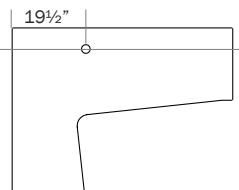

All grommets are two-piece die cast with a silver finish and sized at 60 mm in diameter. For alternate grommet locations MAGRM grommets may be ordered separately and field installed.

Verve

### Grain Direction

The grain direction for Rectangles, Wedges, and Angles runs the length of the tables. For Extended Primary shapes, the grain runs the direction of the longer of two wings. Verve tables are comprised of two separate wings joined at a 45° diagonal; grains run along the length of both wings and are not matched at the joint.

Note —  
Verves with  
woodgrain  
laminates are not  
grain matched.

---

## Miro Desk | Product Specification Details

### Worksurfaces & Base Design

Miro tables are composed of high pressure commercial grade laminate and backing material bonded to 1 $\frac{1}{4}$ " NAUF MDF (medium density fiberboard). The edges of the 1 $\frac{1}{4}$ " surface are profiled with a sweeping chamfer into which bases are recessed. The thin, exposed profile and floating effect creates visual lightness atop the robust, steel foundation. The angular geometric Miro base is formed from 14 gauge, triangular steel tube elegantly mitered at the corners and fixed to the worksurface using concealed steel brackets. Actual Miro worksurface dimensions (length & width) are  $\frac{1}{2}$ " shorter than stated. Worksurfaces that have open spans in excess of 42" include heavy gauge steel reinforcement tube to reduce deflection. The Miro edge is shaped by a custom profiled CNC cutting head that exposes the MDF substrate. The profile is hand finished with water-based clear coat or charcoal stain.

### Miro Base

The triangular Miro Leg tube is .083" thick, induction welded, cold rolled steel, mill-formed on a progressive die line from coiled 14 gauge sheet steel.

Miro Bridge Legs are formed from tube that is CNC miter cut and TIG welded at twin 45° joints. Two identical brakeformed, 12 gauge, cold rolled sheet steel brackets use a channel structure for rigidity.

Miro Single Legs (used at the corners of Verve tables) are made from triangular Miro tube. The mounting plate is formed from 12 gauge, cold rolled sheet steel that is perimeter MIG welded from the top, hiding the weld for cleaner appearance and a stronger seam.

### Metal to Metal Connections

Legs are fastened to desk surfaces with  $\frac{1}{4}$ -20 machine screws threaded into brass inserts at multiple locations for unlimited disassembly and reassembly.

### Grommets

Factory installed grommets are available for all shapes. All grommets are two-piece die cast with a silver finish and sized at 60mm in diameter.

### Broad Range of Sizes

Conference tables are offered in a broad range of sizes, for team and project rooms to formal boardrooms, in one, two, or three-piece surfaces. Grain direction runs the width of the table, and is matched at the seam on multi-surface tables.

### Power Locations

Each separate surface can be specified with a drop-in power unit, centered in the surface.

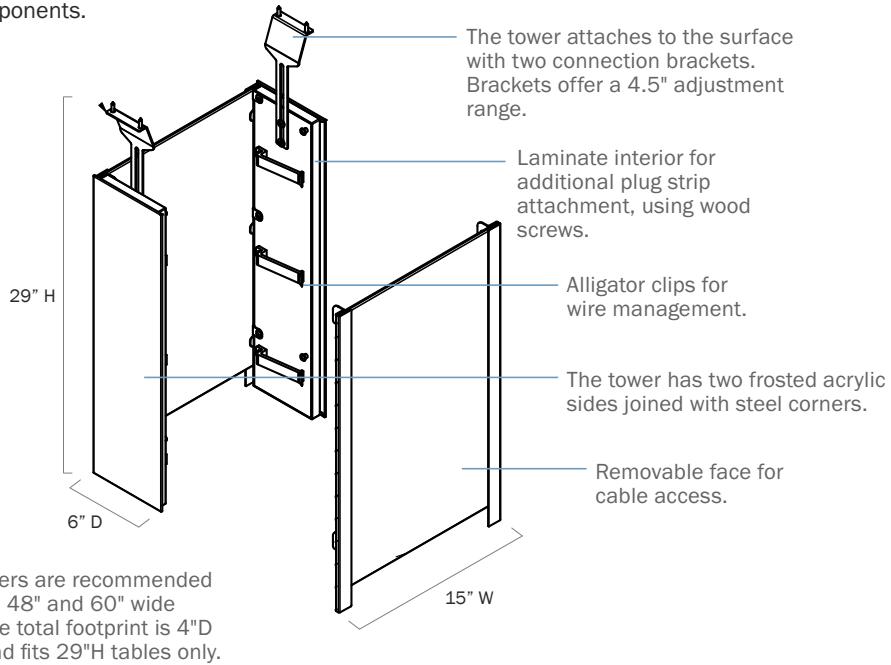

## Miro Conference Table Cable Management

### Cable Tower

Designed to provide seamless wire management, the Conference Cable Tower conceals power, voice, and data wiring within its hollow interior. Constructed of powdercoated steel and attached to the surface with sturdy connection brackets, a keyslot panel provides easy access to the cabling within.

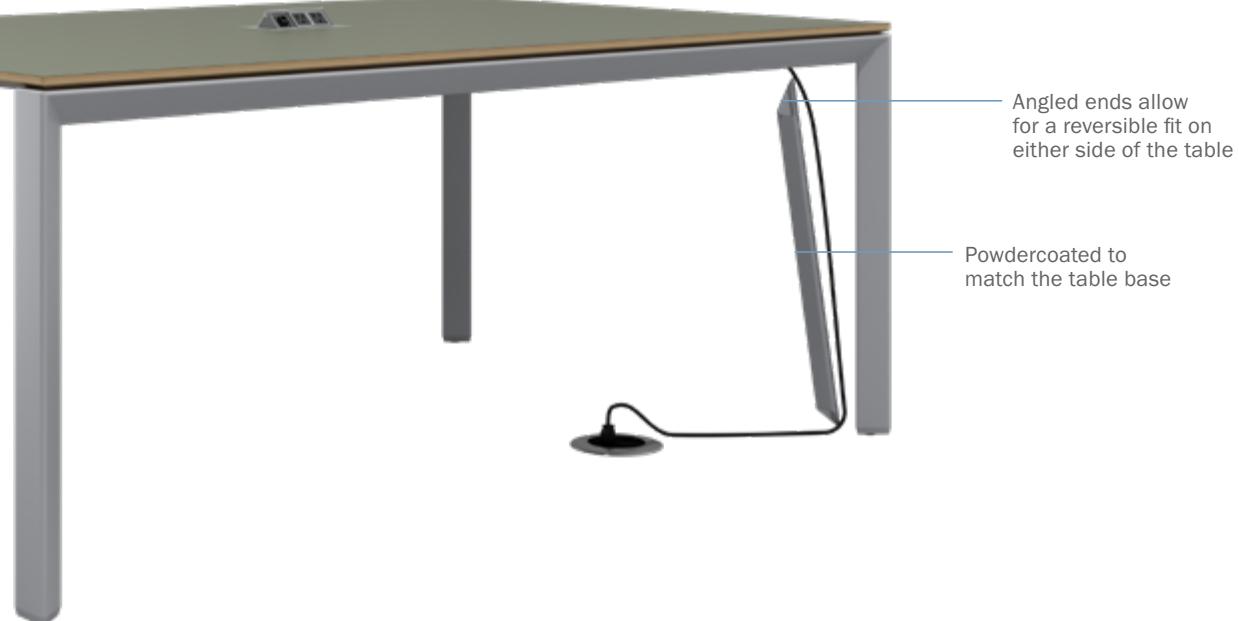

Specify a powdercoat color for metal components.

Interior laminate is always Black.

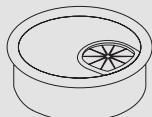

### Conference Cable Channel

The Miro Conference Cable Channel clips onto the inside of the Miro leg and conceals cables in a metal sleeve. Cable channels are recommended for small to medium conference tables and are designed to hold cables for one power unit. Available in each of the Miro Conference Table heights.

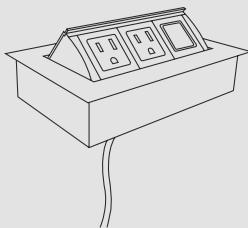

## Miro Meeting & Conference Power & Data

Power is specified per surface, and is centered in each surface. Options include a simple grommet, or power and data drop-in units. Please contact the factory for custom power/data configurations.

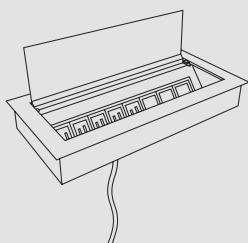

### Grommet

A Medium 60mm Zamak cable grommet with a rubber, star-cut cable grip in Matte Chrome.

### Small Drop-in

Most tables have the option of a small drop-in with plug (2 power receptacles and 1 data port).

### Large Drop-in

Large tables have the option of a large drop-in (5 power receptacles and 3 data ports), which can be specified as plug-in or hardwired.

## Miro Flip Table Specifications

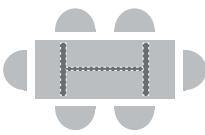

### Key Design Features

A smart selection of worksurface shapes, sizes and base styles ensure that Miro Flip tables work for your team, on your terms.

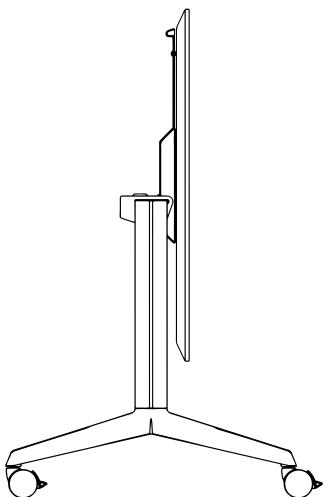

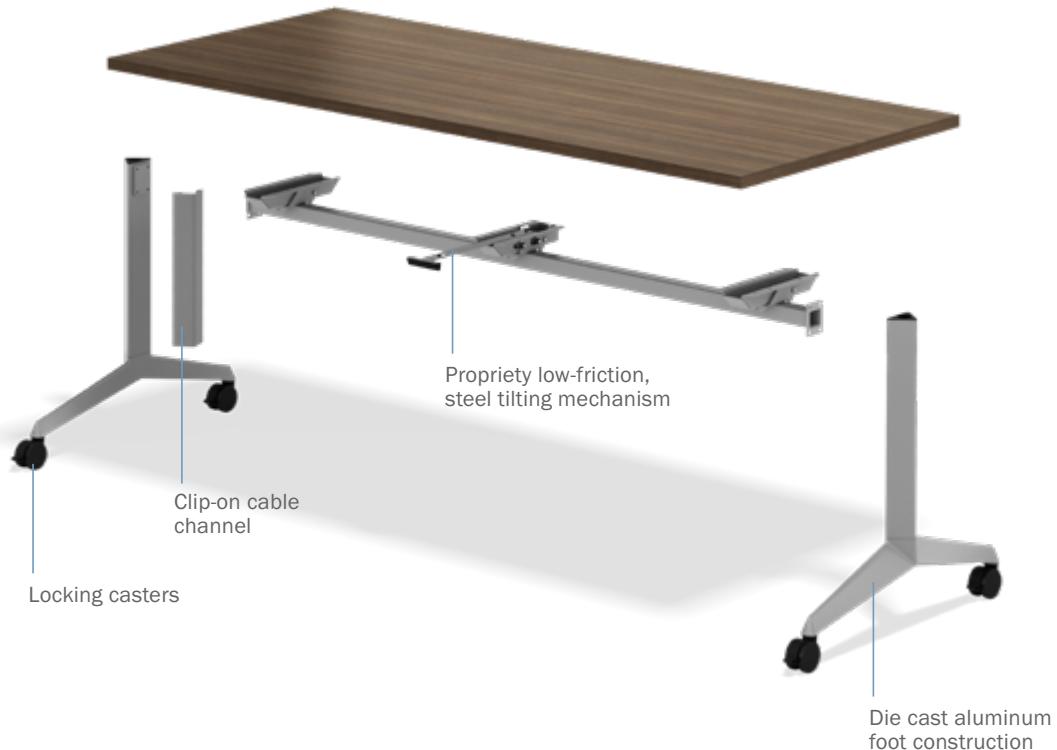

Rectangle Tables are offered with either a Full or Inset Base option

Full Base provides ample cross-table seating for theater-style training.

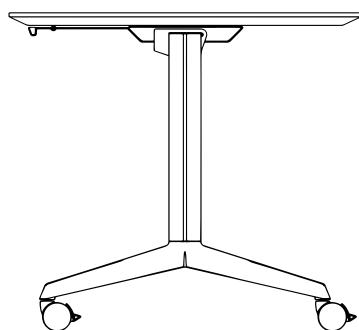

Inset Base provides maximum perimeter seating.

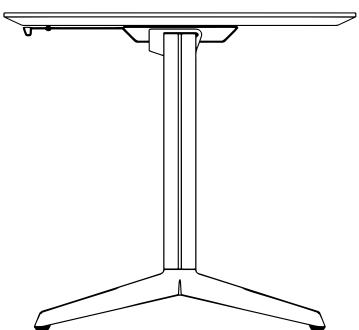

#### Flip

Built for high volume use, Flip was designed with a roller bearing lock mechanism for balanced and effortless reconfiguration.

#### Multipurpose with Casters

Shares common size logic with Flip, but is designed with a fixed non-tilting top.

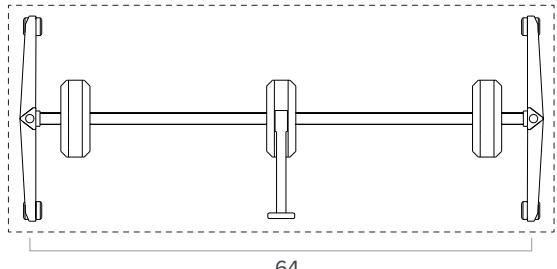

#### Multipurpose with Glides

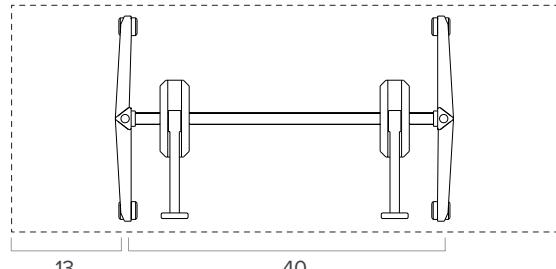

Shares common size logic with Flip, but is designed with a fixed non-tilting top.

## Miro Flip Tables

### Ganging Clips

Optional undersurface ganging clips are used to lock adjacent surfaces together. All Flip Table surfaces are pre-piloted at the factory for easy field installation.

For side by side table connection

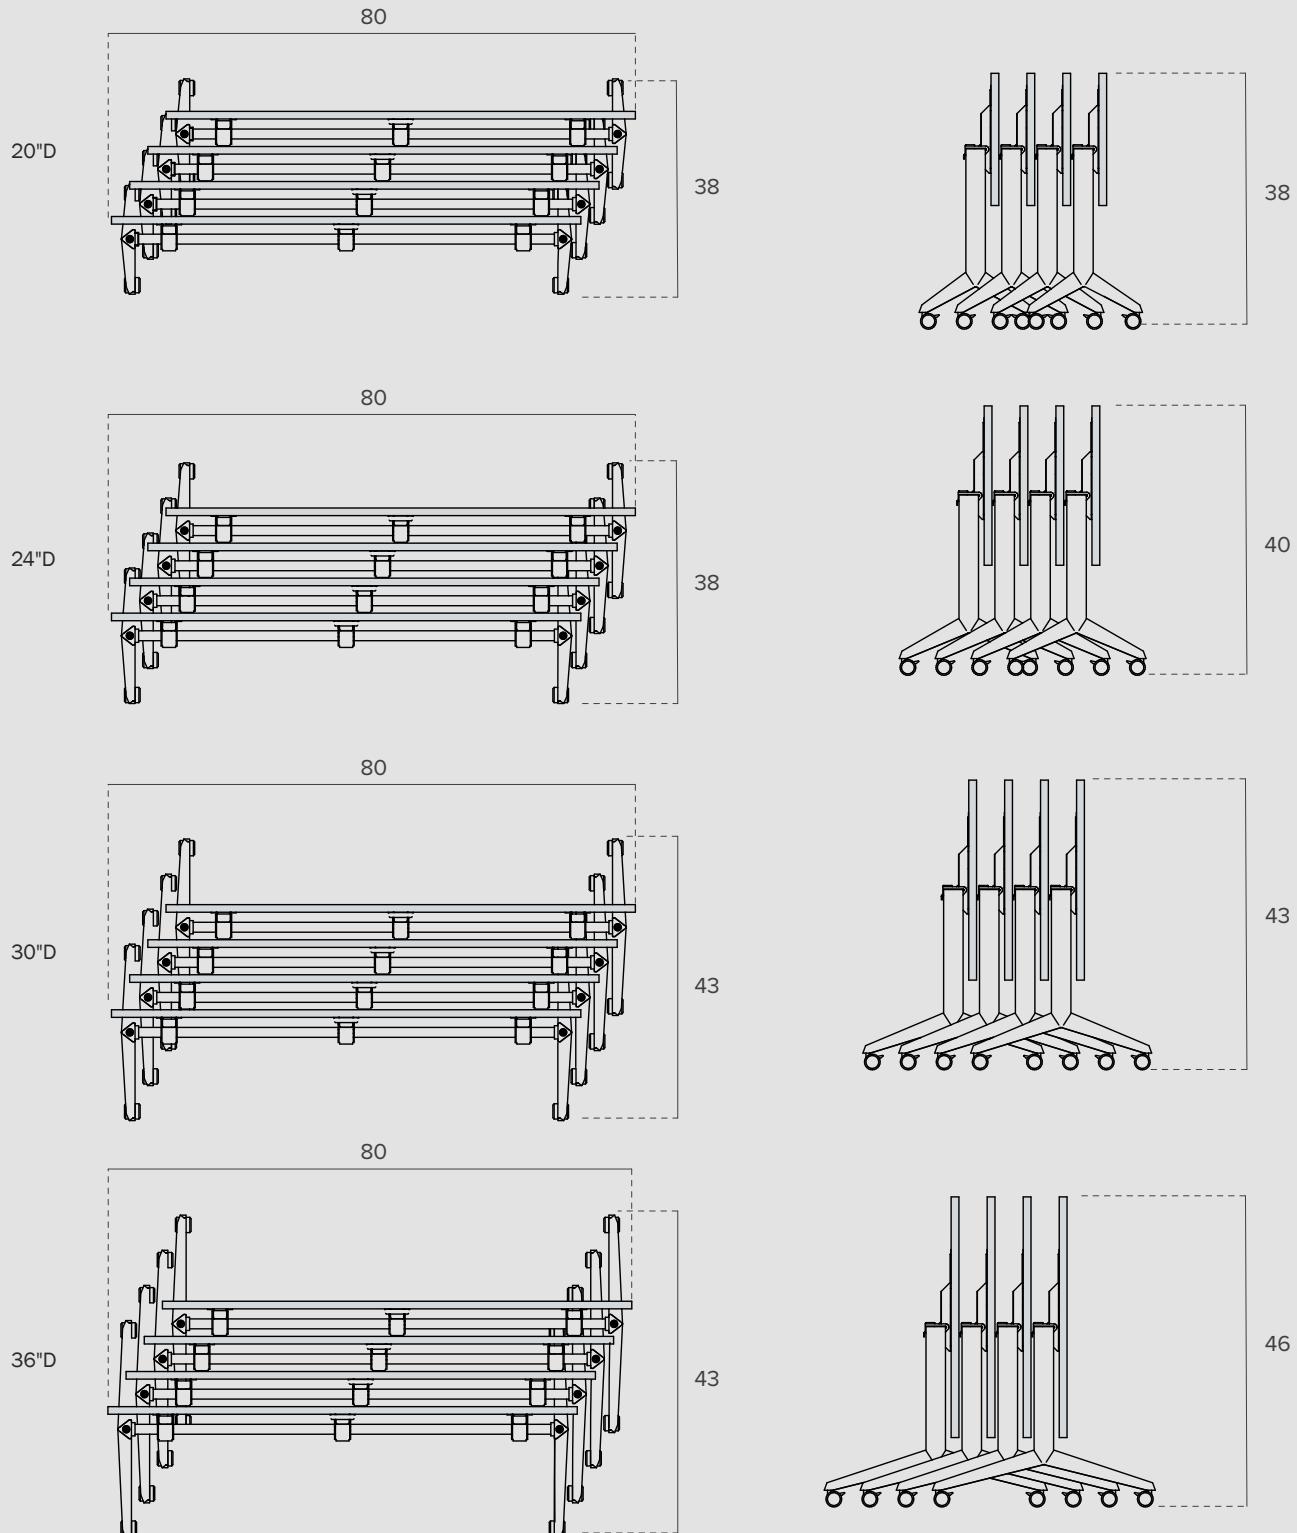

For bracketing four tables together

\*In instances where training tables are arranged in configurations with the table back-to-back, end-to-end, and back-to-end, the table surfaces will not always have perfect alignment. The variability in building floors along with the tolerance of manufacturing coupled with non-adjustable casters, does not allow for a perfect alignment. To alleviate these issues, the use of side-by-side ganging brackets and corner ganging brackets are recommended for these configurations, ie., racetrack shapes, large rectangles.

## Power + Cutouts

### Power Modules

Optional drop-in power options include a 120" plug-in cord, and table cutout if required.

DEAN-3

2 Power and 1 Dual USB with a 120" cord. Clamps to the edge of any table. Trimmed in a smooth molded plastic finish.

NACRE-4

2 Power, 1 data and 1 dual USB with a 120" cord. Trimmed in a white high gloss plastic finish.

\*Dean is not compatible with Knife edges.

MINIPORT-4

2 Power and 2 data with a 120" cord. Trimmed in a Silver Mica plastic finish.

NACRE-4

3 Power and 1 dual USB with a 120" cord. Trimmed in a white high gloss plastic finish.

MHOB-3

2 Power and 1 dual USB with a 120" cord. Trimmed with a silver powdercoated aluminum finish.

MHO-4

2 Power, 1 data and 1 dual USB with a 120" cord. Trimmed in a silver anodized aluminum housing.

MHOB-5

3 Power and 2 dual USB with a 120" cord. Trimmed with a silver powdercoated aluminum finish.

\*120" power cord is ideal for undersurface cable management.

\*\*Byrne power modules with 4 or more simplex power outlets contain an oversized circuit breaker plug head

### Modular Single Circuit Power

Byrne Interlink IQ is a UL listed modular and non-sequential power system with snap-together capability.

## Miro Table | Product Specification Details

### Worksurfaces & Base Design

Miro tables are composed of high pressure commercial grade laminate and backing material bonded to  $\frac{3}{4}$ " NAUF MDF (medium density fiberboard). The edges of the  $\frac{3}{4}$ " surface are profiled with a sweeping chamfer into which bases are recessed. The thin, exposed profile and floating effect creates visual lightness atop the robust, steel foundation. The angular geometric Miro base is formed from 14 gauge, triangular steel tube elegantly mitered at the corners and fixed to the worksurface using concealed steel brackets. Actual Miro table surface dimensions (length & width) are  $\frac{1}{2}$ " shorter than stated. The Miro edge is shaped by a custom profiled CNC cutting head that exposes the MDF substrate. The profile is hand finished with water-based clear coat or charcoal stain.

### Miro Base

The triangular Miro Leg tube is .083" thick, induction welded, cold rolled steel, mill-formed on a progressive die line from coiled 14 gauge sheet steel.

### Grommets

Factory installed grommets are two-piece die cast with a silver finish and sized at 60mm in diameter.

### Miro Flip Table Foot

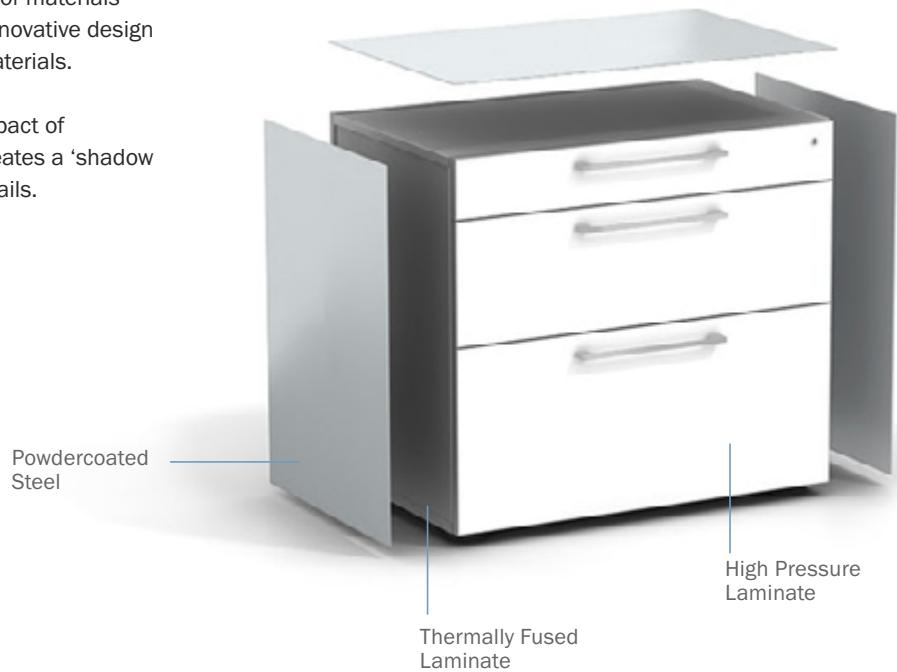

The cast aluminum Miro foot is mechanically secured to the Miro leg tube. A 5/16-18 leveling glide is threaded into the foot for a maximum  $\frac{3}{4}$ " height adjustment. A octagonal head is molded into the glide to allow for inposition leveling.

## Miro Storage

### Metal Veneer

The signature feature of Miro storage is the unique combination of wood cabinets finished with powdercoated steel veneer. This fusion of materials exemplifies Watson's commitment to innovative design and using environmentally preferred materials.

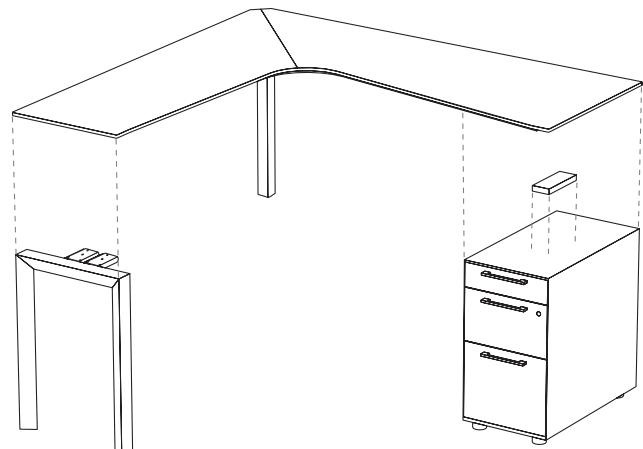

The steel veneer removes the visual impact of traditional plastic edge banding and creates a 'shadow box' effect that frames crisp design details.

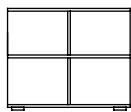

### Underdesk Storage Option

Miro desks can be supported using a base alone or by the use of an underdesk storage unit and riser block.

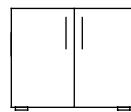

Storage support cabinets can be arranged to fit directly below the desktop or they can be configured to extend 15", 18" or 21"" beyond the end of the desk (30" wide units only). This extension provides additional worksurface space for piling and filing and adds architectural interest to the space.

## Miro Storage

### Credenza AV Option

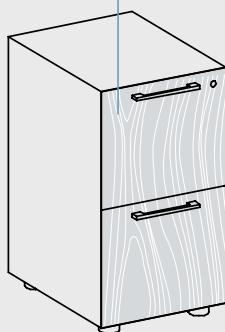

Shelves are height adjustable for maximizing storage space and accommodating different sized electronic equipment, and the credenza back is open for cable access and maximum ventilation.

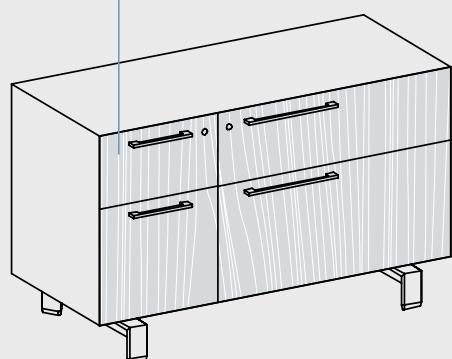

**Note** — The open back allows for appropriate technology ventilation and easy access for cable and technology installation.

### Grain Direction

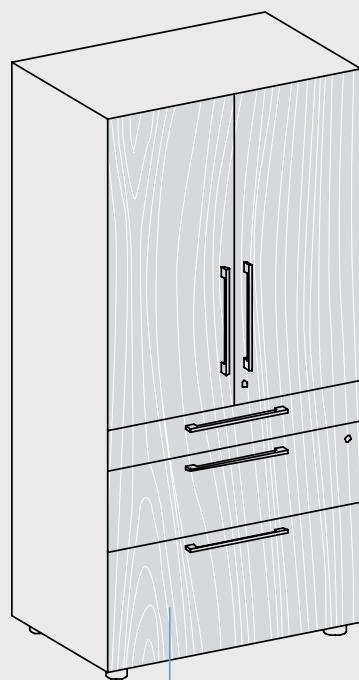

Vertical Faces are grain matched.

On 60"W units, side-by-side door or drawer faces will not grain match horizontally.

Vertical Faces are grain matched.

## Miro Storage

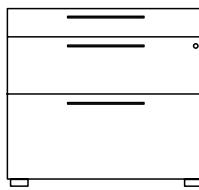

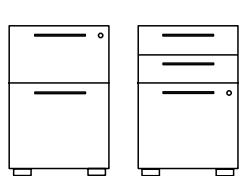

### Lock Options

Storage locks can be specified one of three ways:  
non-locking "N," factory installed "F," or field installed "U."

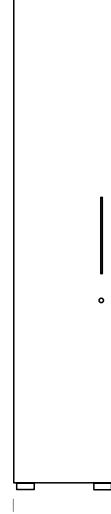

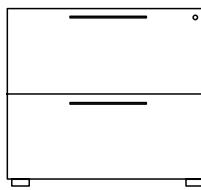

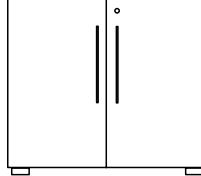

- The non-locking "N" option keeps drawer and door faces clear when locks are not required.
- Factory installed "F" locks are keyed randomly between lock cores numbered 100 - 150 and installed by our factory.
- Field installed "U" locks are ordered separately and keyed alike upon installation in the field.

Locks are placed above vertical handles on doored units;  
exceptions include combos, wardrobes, and overheads. Lock  
placement on drawer units vary; see diagram below.

## Miro Storage | Product Specification Details

### Storage Cases

Storage components are made from wood and steel. Cases are constructed from  $\frac{3}{4}$ ", 45 lb., NAUF MDF (medium density fiberboard), thermally fused with low pressure laminates on the two faces of each board. Case veneers are powdercoated, 22 gauge (.03") thick formed sheet steel. Wall-mounted overhead storage ships with continuous aluminum french rail cleats for wall attachment.

### Drawers and Doors

Drawer bodies are constructed of powdercoated, 16 gauge metal sides. The bottom and backs are made of  $\frac{1}{2}$ " TFL, 45 lb. NAUF MDF (medium density fiberboard). Drawer slides have full extension, 100 lb. ball bearing slides (180lb. on lateral files). Doors feature fully concealed, self closing Euro hinges with three axis adjustment. Door and drawer faces are  $\frac{3}{4}$ ", NAUF MDF with high pressure laminate on both faces.

### Locks

When specified, locks secure all drawers and doors; exceptions include 4" drawers on MS7023041, MS4311550, MS4311562, and MS4311575. Locks are keyed randomly unless specified as "field installed," in which they will be keyed according to tagging specified when ordering.

### Grommets

Factory installed grommets are available for all shapes. All grommets are two-piece die cast with a silver finish and sized at 60mm in diameter.

### Anti-tip

Storage units with file drawers and lateral files are counterbalanced as required. Lateral file drawers feature an anti-tip, interlocking drawer slide that allows only one lateral drawer to open at a time. Tall Wardrobes include a strapping kit to secure to walls.

### Mobile Ped's

Four non-locking, swivel 165 lb., BIFMA tested, casters allow the unit to be pushed sideways through narrow doorways with stability. Casters raise the height of pedestals by 2".

### Miro Pull

A die cut aluminum satin chrome handle designed in Italy is used on all Miro Storage. A 156mm long version is used on 15" wide faces, while a longer, 192mm version is used on 30" wide faces and tall doors.

## Miro Privacy Screens

### Seiri Screen

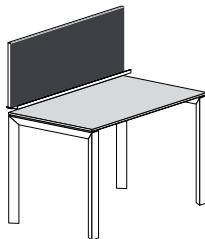

Named for the Japanese term for “sorting” or “arranging,” Seiri Screens provide open plan configurations with elegant space delineation and seated privacy. Seiri Screens come in three heights, 13”H, 16”H and 19”H, providing distinct levels of space division. These tackable screens ship with magnetic bins for organizing desktop items within the screen’s bottom tray.

Bins work independently or in pairs to accommodate a array of documents and small desk items. Each bin fits snugly into the screen’s steel tray and is held firm by a magnet.

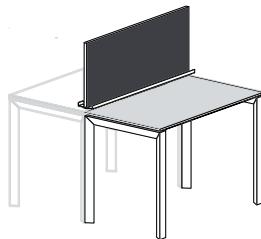

Seiri Screens are bracketed to desk edges and can only be mounted along edges without legs.

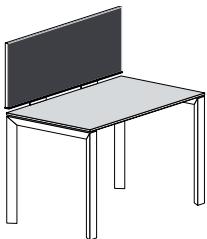

Single Sided

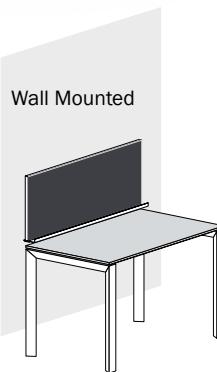

Dual Sided

Trayless

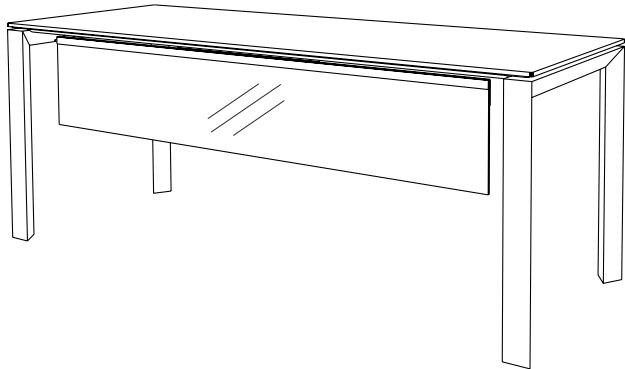

Wall Mounted

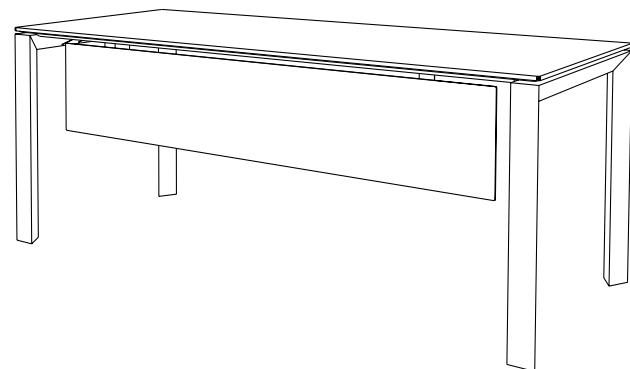

### Modesty Screen

Modesty Shields are available in 1/4" frosted acrylic with a powdercoated top frame or in 22 gauge powdercoated steel with PET felt liner. Undersizing modesty panels by 10 - 12" is recommended to prevent interference with leg or storage support. Modesty panels should be installed approximately 4" inset from the edge of the surface.

### Acrylic

### Steel

---

## Miro Privacy | Product Specification Details

### **Seiri Screens (Desk Mount)**

Seiri Screens are desk mounted and feature an integrated steel accessory rail. Screen covering is 100% recycled polyester woven fabric. The tackable core material is comprised of particleboard and honeycomb composite. The accessory rail is constructed from powdercoated, 14 gauge formed steel. Screens can be specified with 1-sided or 2-sided rails. The bracket component is  $\frac{1}{4}$ " thick, powdercoated steel. Screens ship with four powdercoated 14 gauge, steel accessory bins.

### **Seiri Screens (Wall Mount)**

Wall mount screens are constructed from  $\frac{3}{4}$ " recycled paper board, covered with 100% recycled polyester woven fabric, and backed with  $\frac{1}{4}$ " hardboard. Two-part metal rail cleats are included for wall attachment.

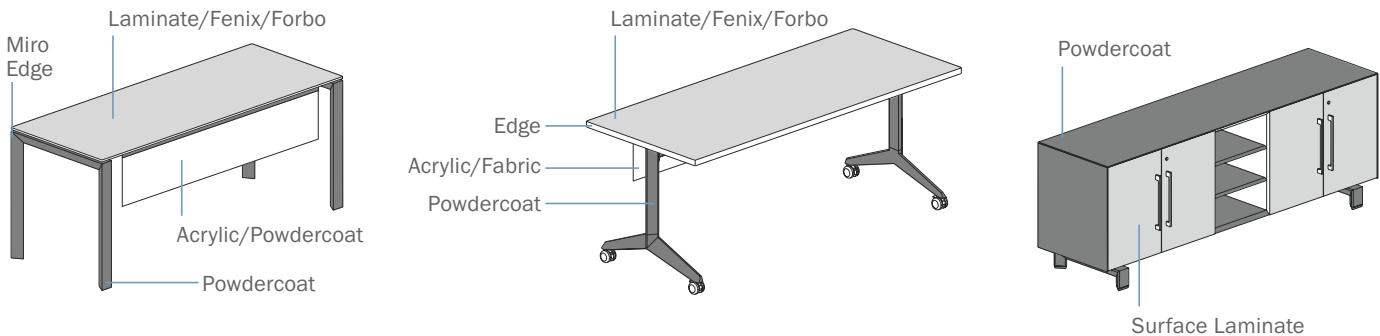

### **Acrylic Modesty Shield**

The acrylic modesty shield is a  $\frac{1}{4}$ " frosted acrylic panel with a 16-gauge powdercoated center mount steel support.

### **Steel Modesty Shield**

The Steel Modesty Shield is formed from 22 gauge (.03"), powdercoated sheet steel and includes acoustic dampening fabric on the backside.
